J. Construct. Steel Research **17** (1990) 335–336

CONTENTS OF VOLUME 17

Numbers 1 & 2

SPECIAL ISSUE ON NEW DIRECTIONS IN STEEL STRUCTURES

Foreword 1

Why are Specifications Different?. 3
LYNN S. BEEDLE (USA)

Deformation Capacity of Steel Structures 33
BEN KATO (Japan)

Column Buckling—Historical and Actual Notes 95
BRUNO THÜRLIMANN (Switzerland)

New Directions in European Structural Steel Design 113
PATRICK J. DOWLING (UK)

Developments in Modern Steel Design Standards 141
THEODORE V. GALAMBOS (USA)

On the Design of Leaning High-Rise Buildings 163
LESLIE E. ROBERTSON (USA)

Calendar 193

Number 3

Buckling Strength of Spherical Shells 195
S. F. EGGWERTZ & L. Å. SAMUELSON (Sweden)

Interaction Domains for Steel Beam-Columns in Fire Conditions 217
L. CORRADI, C. POGGI & P. SETTI (Italy)

A Simplified Analysis of the Strength of Stiffened Box Members in Compression and Bending. 237
TSUTOMU USAMI (Japan)

Beam-Columns in Design Specifications and a Novel Approach 249
H. SCHOLZ (South Africa)

J. Construct. Steel Research (17) (1990)—© 1991 Elsevier Science Publishers Ltd, England.
Printed in Great Britain

Book Reviews 259

Calendar 263

Number 4

Lateral-Torsional Buckling of Channel Beams 265
L. K. SEAH & P. W. KHONG (Singapore)

Design of Columns Fabricated from Slender Plates 283
K. J. R. RASMUSSEN, A. J. DAVIDS & G. J. HANCOCK (Australia)

Bracing Requirements for Laterally Unrestrained Beams 305
Y. C. WANG & D. A. NETHERCOT (UK)

Starred Angles Supporting Secondary Trusses 317
M. C. TEMPLE & K. H.-W. MOK (Canada)

Book Reviews 329
